## Shop play win.com jewel

Welcome to the revamped store, play, Win!® MONOPOLY App. With the Shop, Play, Win! app ® MONOPOLY members can use the registration app (1) for online game MONOPOLY; (2) enter and track your online MONOPOLY codes; (3) scan ticket codes for the games they receive; and (4) find rules and odds charts, winners, frequently asked questions, premium submission forms, privacy policies, customer service, etc. Shop, Play, Win!® MONOPOLY app can only be used in collaboration with MONOPOLY Gathering and Win Games at participating Albertsons Companies, LLC banners (Acme, Albertsons, Albertsons Market, Amigos, CarrS, Jewel-Osco Market Street, Pak'n Save, Pavilions, Randalls, Safeway, February 19, 2021 Version 2.2.26 This app is just a website that would be convenient enough for quick entry (god-aweful) games piece codes, but the site/app has been completely broken this year: Login is never saved, the site freezes/doesn't respond much more often than it actually works, and if you can get as far as the scanner, it doesn't seem to work if you have a big , natural light (Seems to have a problem if overhead light casting). Terrible. Don't play this year if they don't fix their myriad issues. The alternative - the physical game board - has its own substantive issues where I don't think there was any quality control involved. I think their policy If it broke, don't fix it because they've been using their totally un-sensitive 5-digit codes with zero actual references to Monopoly for years! Don't waste your customers' time on this garbage. I remember when I moved into the Bay Area to my housemate and I was playing Monopoly this year and we thought it was funny, but grew frustrated with the great effort involved in figuring it out and tracking down little pieces of paper. So I ignored it for years. But this year I opened some and realized that there was an app. I had some problems with the login but I did score on their website and then I was able to scan my tickets and it was pretty painless. I could imagine kids and parents having a lot of fun with it, getting to scan barcodes as a checkout person who honestly continues as the little trick that happens every day in the supermarket. Thanks for making this app and I hope you keep working on bugs, but it has a real perspective and is now a fun little addition to shopping. Last year I downloaded this app and there were a few things that get annoying about it. The first thing I had to log in was every time I opened the app, which was fine, until one day I tried to log in, and said my account didn't exist. So I thought well, maybe I'm being stupid and typing it in the right tried a few more searched for my name and stuff.... didn't find me. I created the same exact profile, the same number, everything. Lost all my tokens (62 tokens! I was saving...) and obviously I threw away these papers. So I stopped playing the game ... hell, I stopped going Safeway cause I didn't even deal with it (yes, I was a kid about it.) So this year seems fine, I don't have to go in every time, and nothing strange seems to be wrong. I thought I would write some good review because I noticed that there were a lot of bad ones.
